

SPRING 2008

REHABILITATION RESEARCH SEMINARS

Wednesdays, 12:00 – 1:00PM
HPNP Building, East Wing, Room G-101

January 23, 2008:

David Criswell, PhD

Associate Professor, Department of Applied Physiology & Kinesiology, University of Florida

“Availability of Nitric Oxide Limits Mechanical Activation of Satellite Cells on Isolated Skeletal Muscle Fibers.”

February 13, 2008:

Krista Vandenberg, PT, PhD

Professor and Chair, Department of Physical Therapy, University of Florida

“A Translational Approach to Study Disuse Atrophy and Muscle Plasticity.”

February 27, 2008:

Christine Sapienza, PhD

Professor and Chair, Department of Communication Sciences and Disorders, University of Florida

“Mechanisms and Outcomes Associated with Expiratory Muscle Strength Training for Persons with Parkinson’s Disease.”

March 12, 2008:

Cancelled due to Spring Break

March 26, 2008:

Gerard Brennan, PT, PhD

Director for Clinical Quality and Outcomes, Rehabilitation Agency, Intermountain Health Care, Salt Lake City, Utah

“Quality Improvement Meets Evidence-Based Practice.”

April 9, 2008:

Michael Delp, PhD

Professor and Chair, Department of Applied Physiology & Kinesiology, University of Florida

“The Effects of Chronic Unloading on Skeletal Blood Flow and Bone Remodeling.”

April 23, 2008:

Chris Hass, PhD

Assistant Professor, Department of Applied Physiology & Kinesiology, University of Florida

“Motor Complications in Autism”
