Appendix 5

Interdisciplinary Training in Rehabilitation and Neuromuscular Plasticity (NMPT)

Training Evaluation Form

Trainee Name: _____________________________ Date: _______________
Primary Mentor Name: _____________________________
Graduation Date: ___________ Non-UF email address: ________________

What did you like most about the NMPT program?

[Blank Space]

What did you like least about the NMPT program?

[Blank Space]

NMPT Program Influence on Trainee Development

In reference to the NMPT program influence on trainee development, please rate the following on a scale of 1 to 5, where 1 is least relevant and 5 is most. Please mark N/A if the question is not applicable.

What aspects of the NMPT program did you find most relevant to your career training?

- Required courses
- Elective courses
- Research Experiences
- Interactions with primary mentor
- NMPT Rehabilitation Research Seminars
- NMPT NeuroNoons Seminars
- NMPT Annual Symposium

[Blank Spaces]
During my time as a trainee, I have attended the Rehabilitation Science Seminar Series:

<table>
<thead>
<tr>
<th>Every Seminar</th>
<th>75% of seminars</th>
<th>50% of seminars</th>
<th>25% or fewer</th>
</tr>
</thead>
</table>

**NMPT Program Administration and Resources**

In reference to the NMPT program administration and resources, please rate the following on a scale of 1 to 5, where 1 is strongly disagree and 5 strongly agree. Please mark N/A if the question is not applicable.

**During my time in the NMPT program:**

- Communication has been excellent
- Administrative assistance has been excellent
- Information technology support has been helpful in meeting course and research goals
- I have had access to innovative and specialized research equipment
- I have had appropriate resources available to me to further my training

**Comments:**

**NMPT Program Effectiveness**

In reference to the NMPT program effectiveness, please rate the following on a scale of 1 to 5, where 1 is strongly disagree and 5 strongly agree. Please mark N/A if the question is not applicable.

**In comparison to when I began the NMPT program:**

- My knowledge of neuromuscular plasticity is better
- I have a better appreciation of the importance of translational research
- My foundation in research design, data management, and data analysis is stronger
- I have better research and technical skills for my area of interest
- I have stronger interest in pursuing a future career in translational research related to neuromuscular plasticity
- I have a clear understanding of the ethical and responsible conduct of research

**Comments:**
Appendix 5

In comparison to peer trainees NOT in the NMPT program:

My knowledge of neuromuscular plasticity is better

I have a better appreciation of the importance of translational research

My foundation in research design, data management, and data analysis is stronger

I have a stronger interest in pursuing a future career in translational research related to neuromuscular plasticity

I have a better understanding of the ethical and responsible conduct of research

Comments:

My overall satisfaction with the NMPT program is?

Very Low

Low

Neutral

High

Very High

What should the NMPT program be doing that it is currently not doing to assist you and other to be successful in a research career?

Please use the space below to write an additional comments or suggestions for the NMPT program:
