

THE RESEARCH CONNECTION

Sponsored by the Brooks/UF-PHP Research Collaboration

“Best Practice for Musculoskeletal Pain: *Optimizing Patient-Centered Care at Brooks Rehabilitation*”

Musculoskeletal pain is highly prevalent and a leading cause of disability in the U.S. In this talk, Dr. Beneciuk will provide specific examples of how recently completed, ongoing, and future quality improvement and research projects at Brooks Rehabilitation are linked to best practice recommendations for musculoskeletal pain care.

About the Speaker: Jason Beneciuk, PT, DPT, PhD, MPH

Dr. Beneciuk is a clinical research scientist at Brooks Rehabilitation and clinical investigator with musculoskeletal concentration in the Brooks/UF-PHP Research Collaboration. In addition to his roles in the Research Department at Brooks, he is also an assistant professor in the Department of Physical Therapy at the University of Florida where he teaches evidence-based practice in the entry-level Doctor of Physical Therapy program. He has been supported by the National Institutes of Health K12 Rehabilitation Research Career Development Program, the Patient-Centered Outcomes Research Institute, the Center on Health Services Training and Research and the Foundation for Physical Therapy Research. Dr. Beneciuk currently serves as an Editorial Board member for Physical Therapy and International Editorial Review Board member for the Journal of Orthopaedic and Sports Physical Therapy.
